OTC WIRELESS

WiJET.G

QUICKSTART GUIDE

Included in the package:

☑ WiJET.G Unit
☑ Antenna
☑ 5V DC Power Adapter
☑ CD-ROM with Application Software and Technical Manual
☑ Quickstart Guide
☑ Registration Card

Step1: Connecting WiJET.G Physically

A. Connect the VGA cable from a projector/monitor to the VGA port at the rear of the WiJET.G unit.

B. Turn on the projector/monitor.

C. Connect the provided 5V DC power adapter into the port labeled 5V at the rear of the WiJET.G unit. The ON LED will turn solid green.

D. At the end of a brief "boot up" period, a banner page should be displayed by the WiJET.G through the connected projector/monitor. The LINK Indicator on the front of the unit should blink red.

E. The WiJET.G unit now is ready for connection to an 802.11b/g equipped PC.

Step 2: Configuring your PC for WiJET.G

A. Take note of the SSID located at the top left of the banner page displayed by the unit.

B. Follow the manufacturer's instruction to configure the WiFi 802.11b/g adaptor as a **Station** and in **Infrastructure** mode. Connect PC adaptor to the AP with the **SSID** of WiJET.G noted above.

C. **For optimal performance, disable the PC's Video Hardware Accelerator.** From the Display Properties window, click on the "Settings" tab. Click on the "Advanced" button followed by the "Troubleshoot" tab. Move the slider for "Hardware acceleration" to none. **Turn off the XP firewall.** Refer to MS Windows administration references for the instructions.

Step 3: Installing Software & Using WiJET.G

A. Insert the provided WiJET.G CD-ROM on a Windows 98/NT/2000/XP computer and a dialog should come up. You can choose to run the **Presentation Session Manager** (**PSM**) software directly from the CD-ROM for temporary use, or to install it on the host PC for frequent use. With installation, the PSM will be available on the Windows Desktop and the Start menu.

B. Double-click on the WiJET.G shortcut on the Desktop or the WiJET.G executable on the CD-ROM to start the **PSM**. Alternatively, go to Start, Program Files, WiJET.G Utility, click on "WiJET.G PSM" to start it**.** The main **PSM** dialog will show.

C. Click the "Establish a Session" button on the **PSM** and the WiJET.G should display the computer's desktop through the connected projector/monitor. The WiJET.G is now in session!

   Note: Your wireless device must have a valid IP for **PSM** to establish a session. The wireless device running DHCP may take a

long time to have a valid IP address assigned. You can choose to manually assign an IP address to the host. Please refer to Technical Manual Chapter 3.

D. Click "Release the Session" button to release the connection to the WiJET.G and allow another user to connect to the WiJET.G. You can re-connect to the WiJET.G by clicking "Establish a Session" again as soon as the other user has released the WiJET.G session.

E. To exit the **PSM**, click on "exit".

Step 4: Administering WiJET.G

A. Follow Step 2 to configure your wireless adapter card. Follow Step 3 to run the PSM and connect with the WiJET.G unit. Right-click on the WiJET.G icon on the System Tray and select the menu item to show connected WiJET.G unit(s).

B. Select the unit to be administered and click on the "Admin" button. This launches a Web browser and accesses the WiJET.G administrative facilities. First you must log-in. At default, enter the "admin" for user name and "public" for password.

C. Navigate the administrative web pages to customize the configuration of WiJET.G unit.

Please consult the **WiJET.G Technical Manual** for additional features and customization.
