OTC WIRELESS

WiJET.Gmac

QUICKSTART GUIDE

WiJET.Gmac: Wireless Projector/Monitor Adapter for Macintosh (OS X and above)

Included with the WiJET.Gmac

☑ WiJET Wireless Projector/ Monitor Adaptor
☑ Antenna
☑ 5V DC Power Adapter
☑ CD-ROM with Software and Technical Manual
☑ Registration Card
☑ Quickstart Guide

Step 1: Connecting the WiJET.Gmac to a Projector/Monitor

A. Connect the included 5V DC power adapter into the port labeled 5V at the rear of the WiJET. The ON LED will turn solid green.

B. Connect the VGA cable from either a projector or a monitor to the VGA port at the rear of the WiJET. Turn on the projector or monitor.

C. When the LINK Indicator located on the front of the WiJET blinks red, the WiJET is ready to establish a wireless connection to a computer. At this time, a Banner Display screen is visible on the display of the WiJET connected projector/ monitor.

Step 2: Configuring the MAC Wireless Adapter

A. Take note of the SSID located at the top of the banner page being displayed by the projector/ monitor connected to the WiJET.

B. Configure your AirPort or AirPort Extreme, or other wireless adaptor such as OTC's ACR-201 on your Macintosh computer to use Client mode and the SSID noted in **Step 2-A.** After the correct configurations have been made, the wireless card on the Macintosh will be wirelessly connected to the WiJET.Gmac.

Step 3: Installing the WiJET.Gmac software

A. Insert the distribution CD into a CD-ROM drive and install the **WiJET-PSM** on a 802.11b/g enabled Macintosh computer running OS X or above.

B. Double-click on the CD icon on the desktop. Drag and drop the Mac **WiJET-PSM** folder to any location of your choice on your hard disk.

C. Double-click the **WiJET-PSM** icon in the folder to start the **WiJET-PSM** application.

Step 4: Using the WiJET .Gmac

A. The **WiJET-PSM** will automatically search for available WiJET units. If only one WiJET is found, the connection will be automatically established. Skip **Step B** if this happens. If more than one is found, the "Establish a Session" button becomes enabled.

B. Highlight one of the WiJETs listed and click the "Establish a Session" button to start a presentation session. If the session can be established, the WiJET.Gmac will display your computer's desktop on its connected projector or monitor. Otherwise, an error message will be displayed in the "WiJETPSM Status" box.

C. Click the "Release a Session" button to release your presentation session so that another user can establish a session with the WiJET.Gmac. You can re-establish a session by clicking "Establish a Session" button again as long as nobody else is concurrently using the same WiJET.

D. To terminate the **WiJET-PSM** application, click on the "Exit" button or "x" (the close button on the top-right corner of the application window).

Please consult the Technical Manual for additional information on using the WiJET.Gmac.
